Storytelling

Idea:
- There is a lot of news about the growth of Airbnb in Amsterdam. Especially in the city center.
- I wanted to know what was true about the news and especially how many Airbnb's are there in Amsterdam and where are they located.

Data:
- Got a good source of Airbnb data, www.insideairbnb.com. They provided me the all the data.
- The review count was something I needed to do with Excel. I transformed the raw data into a review count per neighborhood.

Story:
- I think you can see that, as expected, the most Airbnb's are located in the city centre.
- The grow in reviews from 2016, is an indication that there are coming more and more Airbnb every month.
